Dear Parents,

Covid 19 - In the event of school closure

Educational Provision

We have been following Government guidance very carefully over the last few weeks and you will have received the updates through the Bulletin and on posters around school.

Please check the Newsfeed/COVID-19 document for Government advice and school letters.

With the seemingly inevitable closing of the school we have put the following in place to ensure the children have the best possible learning provision whilst we are closed in order to minimise the impact of COVID-19 on their attainment.

Online educational provision:

All codes, email log-ins and addresses are kept in the front of their homework diaries

- The children have textbooks and exercise books for English, Maths and Science and work will be set daily for English and Maths on Edmodo.

Edmodo:

- Work for all subjects will be allocated on Edmodo for Forms 1-6 and on Tapestry for EYFS.
- Other subjects will be set on the day the lesson shows on the class timetable. This could be project based or a one off independent activity.
- All logins and passwords are in the children's school homework diaries
- If the children can't access Edmodo then please email the subject teacher and they will let you know details of the work set. (See emails below)
- Children can access Edmodo through their gmail accounts
- When the children have completed a set piece of work, and you wish to get feedback on it from the subject teacher, then take a photograph or scan the work and upload it onto Edmodo as an attachment, or send it via email to the subject teacher. The subject teacher will respond, if required, to any work they receive within 48hrs, in the school working day between 8.35 to 4pm.

MyMaths/Active Learn :

- Login codes for MyMaths and Active Learn are also in the children's homework diaries. Any activities to be carried out on these platforms will be allocated by the maths teacher
- The children can do any of the lessons and homework on my maths without it being allocated by the teacher.

Tapestry Reception

- Reception teachers will post a breakdown of activities for each day of the week. This will include a maths activity and a writing activity a day. We don't expect to see uploaded evidence of all activities but it would be good to be able to feedback on some things where possible. Extra reading books will be sent home and an exercise book to complete writing activities. If you are unable to log in to Tapestry for any reason please email your child's teacher to be sent a new login link. In order to receive Tapestry notifications in the moment, please enable push notifications in your Tapestry settings.

Kindergarten

- Kindergarten teachers will post some suggested weekly activities for the children to complete at home, these will be a combination of recorded and practical activities. We will include phonic and maths learning, following our usual pattern of introduction. We would love to see Tapestry updates from parents to evidence the home learning and to continue the two way communication links to inform our next steps. In order to receive Tapestry notifications in the moment, please enable push notifications in your Tapestry settings. If you are unable to log in to Tapestry for any reason please email your child's teacher to be sent a new login link.

Nursery

- Nursery teachers will post suggested activities on Tapestry, that will encompass all areas of learning, based on our current knowledge of the children. If you are unable to log in to Tapestry for any reason please email Miss Earl to be sent a new login link. In order to receive Tapestry notifications in the moment, please enable push notifications in your Tapestry settings.

Email:

- Should any of these platforms fail due to massive, worldwide usage, or for whatever reason, then we shall send work to parent contact emails so please ensure we have your up to date contact details

These plans are subject to change In the event of staff illness and staff family personal circumstances. Parents will be notified of staff illness so that they understand work will still be posted but feedback on work may not be given for that subject.

Kind regards

Critical Incident Team
